CAREER SUMMARY

Entry-level Computer Science graduate specializing in Cyber Security with a strong interest in backend and full-stack development. Solid foundation in JavaScript, Python, REST APIs, and databases, with hands-on experience building real-world projects and solving programming problems.

TECHNICAL SKILLS

Programming Languages: JavaScript, Python

Web & Backend: HTML, CSS, Node.js, Express.js, REST APIs

Databases: SQL, MongoDB (Basics)

Libraries & Tools: OpenCV (Basics), Git, GitHub, VS Code

Core Concepts: Data Structures & Algorithms (Basics), OOP, Client–Server Architecture, HTTP Methods, SDLC Fundamentals

PROJECTS

User Management System (Full Stack CRUD Application) *(In Progress)*

Tech Stack: HTML, CSS, JavaScript, Node.js, Express.js, SQL

- Designing a full-stack web application to manage user records
- Implementing RESTful APIs for create, read, update, and delete operations
- Working on frontend–backend integration using HTTP requests

Real-Time Face Detection System

Tech Stack: Python, OpenCV

- Implemented a real-time face detection application using OpenCV
- Used Haar Cascade classifier to detect faces from live webcam feed
- Processed image frames and applied detection logic efficiently

CERTIFICATIONS

Full Stack Web Development Certification

JavaScript (Intermediate) Certification

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science Engineering (Cyber Security)

Oriental College of Technology

Graduation Year: 2025

ADDITIONAL INFORMATION

Able to clearly explain projects and technical concepts

Strong problem-solving mindset and willingness to learn
